

SWETAM MEHER

Software Engineer II | ETL Developer | SQL | GCP | Informatica PowerCenter | Quantum Treasury Suite

Haywards Heath, England, United Kingdom | +44 7717311654 | mehersitu2013@gmail.com | linkedin.com/in/swetam-meher | tinyurl.com/swetam-meher

Professional Summary

ETL and data engineering professional with 8+ years of IT experience across requirement analysis, technical design, Informatica PowerCenter development, SQL validation, testing, release support, and production operations. Experienced with Quantum Treasury Suite workflows, cloud computing concepts, GCP-oriented delivery, and Microsoft Azure fundamentals. Known for combining structured engineering delivery with clear stakeholder communication and a creative eye from graphic design and photography.

Core Skills

ETL & Data: Informatica PowerCenter, ETL mapping design, workflow/session support, data transformation, SQL, database workflows, reconciliation, data quality checks, defect analysis

Platforms: Google Cloud Platform, Microsoft Azure fundamentals, Quantum Treasury Suite, cloud computing concepts, enterprise application support

Delivery: Requirement analysis, technical documentation, testing, production support, stakeholder communication, issue triage, release handover, team collaboration

Professional Experience

Software Engineer II - IntraEdge

May 2026 - Present | Burgess Hill, England, United Kingdom

- Deliver ETL, SQL, cloud-oriented, and enterprise application work for business-critical data workflows.
- Translate requirements into maintainable data processing logic, validation approach, and operational support steps.
- Partner with stakeholders and delivery teams to clarify data expectations, investigate issues, and support smooth execution.
- Apply treasury application knowledge, data quality discipline, and production support awareness to reduce ambiguity in delivery.

Technology Analyst - Infosys

April 2024 - May 2026 | Brighton, England, United Kingdom

- Designed, developed, tested, and supported ETL workflows using Informatica PowerCenter and SQL.
- Performed requirement analysis, impact assessment, defect triage, and root-cause investigation for data workflows.
- Supported Quantum Treasury Suite related data operations with emphasis on accuracy, traceability, and reconciliation.
- Prepared clear technical updates and worked with cross-functional stakeholders to keep delivery aligned with business needs.
- Contributed to production support routines, release readiness, and handover documentation for maintainable operations.

Technology Analyst - Infosys

December 2023 - March 2024 | Bhubaneswar, Odisha, India

- Supported ETL development and analysis activities across database, application, and operational workflows.
- Worked on technical documentation, testing support, and issue resolution while coordinating with distributed teams.
- Applied SQL and data management knowledge to validate outputs and support predictable delivery.

Senior System Engineer / System Engineer - Infosys

June 2021 - November 2023 | Bhubaneswar, Odisha, India

- Built a strong engineering foundation across development support, testing, incident analysis, and data workflow operations.
- Worked with SQL, ETL concepts, application support processes, and team-based delivery practices.
- Improved ability to move from operational issue analysis to structured technical resolution and stakeholder communication.

Senior Operational Executive / Operational Executive / Trainee - Infosys

June 2018 - May 2021 | Mysore and Bhubaneswar, India

- Started career in disciplined IT operations and progressed through increasingly technical delivery responsibilities.
- Developed a foundation in process adherence, issue handling, service continuity, client communication, and teamwork.

Selected Project Themes

- Enterprise ETL delivery: requirement analysis, mapping design, transformation logic, workflow testing, and production handover.
- Treasury data reliability: Quantum Treasury Suite support, reconciliation focus, traceability, and business-critical issue handling.
- Cloud-ready data delivery: SQL validation, platform awareness, documentation, and collaboration for modern data workflows.
- Creative technical communication: visual clarity, structured documentation, and photography/design-led attention to detail.

Education

MSc in IT, Information Technology - ISBM University | August 2021 - June 2023

Graduation, Computer Science - Buxi Jagabandhu Bidyadhar Autonomous College, Bhubaneswar | May 2018

Intermediate - Institute of Higher Secondary Education, ITER, Bhubaneswar | June 2015

Certifications & Recognition

Microsoft Certified: Azure Fundamentals | Introduction to SQL

Awards: Insta Awards and Eureka RISE Award

Additional Strengths

Graphic design, photography, visual storytelling, clear documentation, stakeholder collaboration, proactive problem solving.
